Keynote

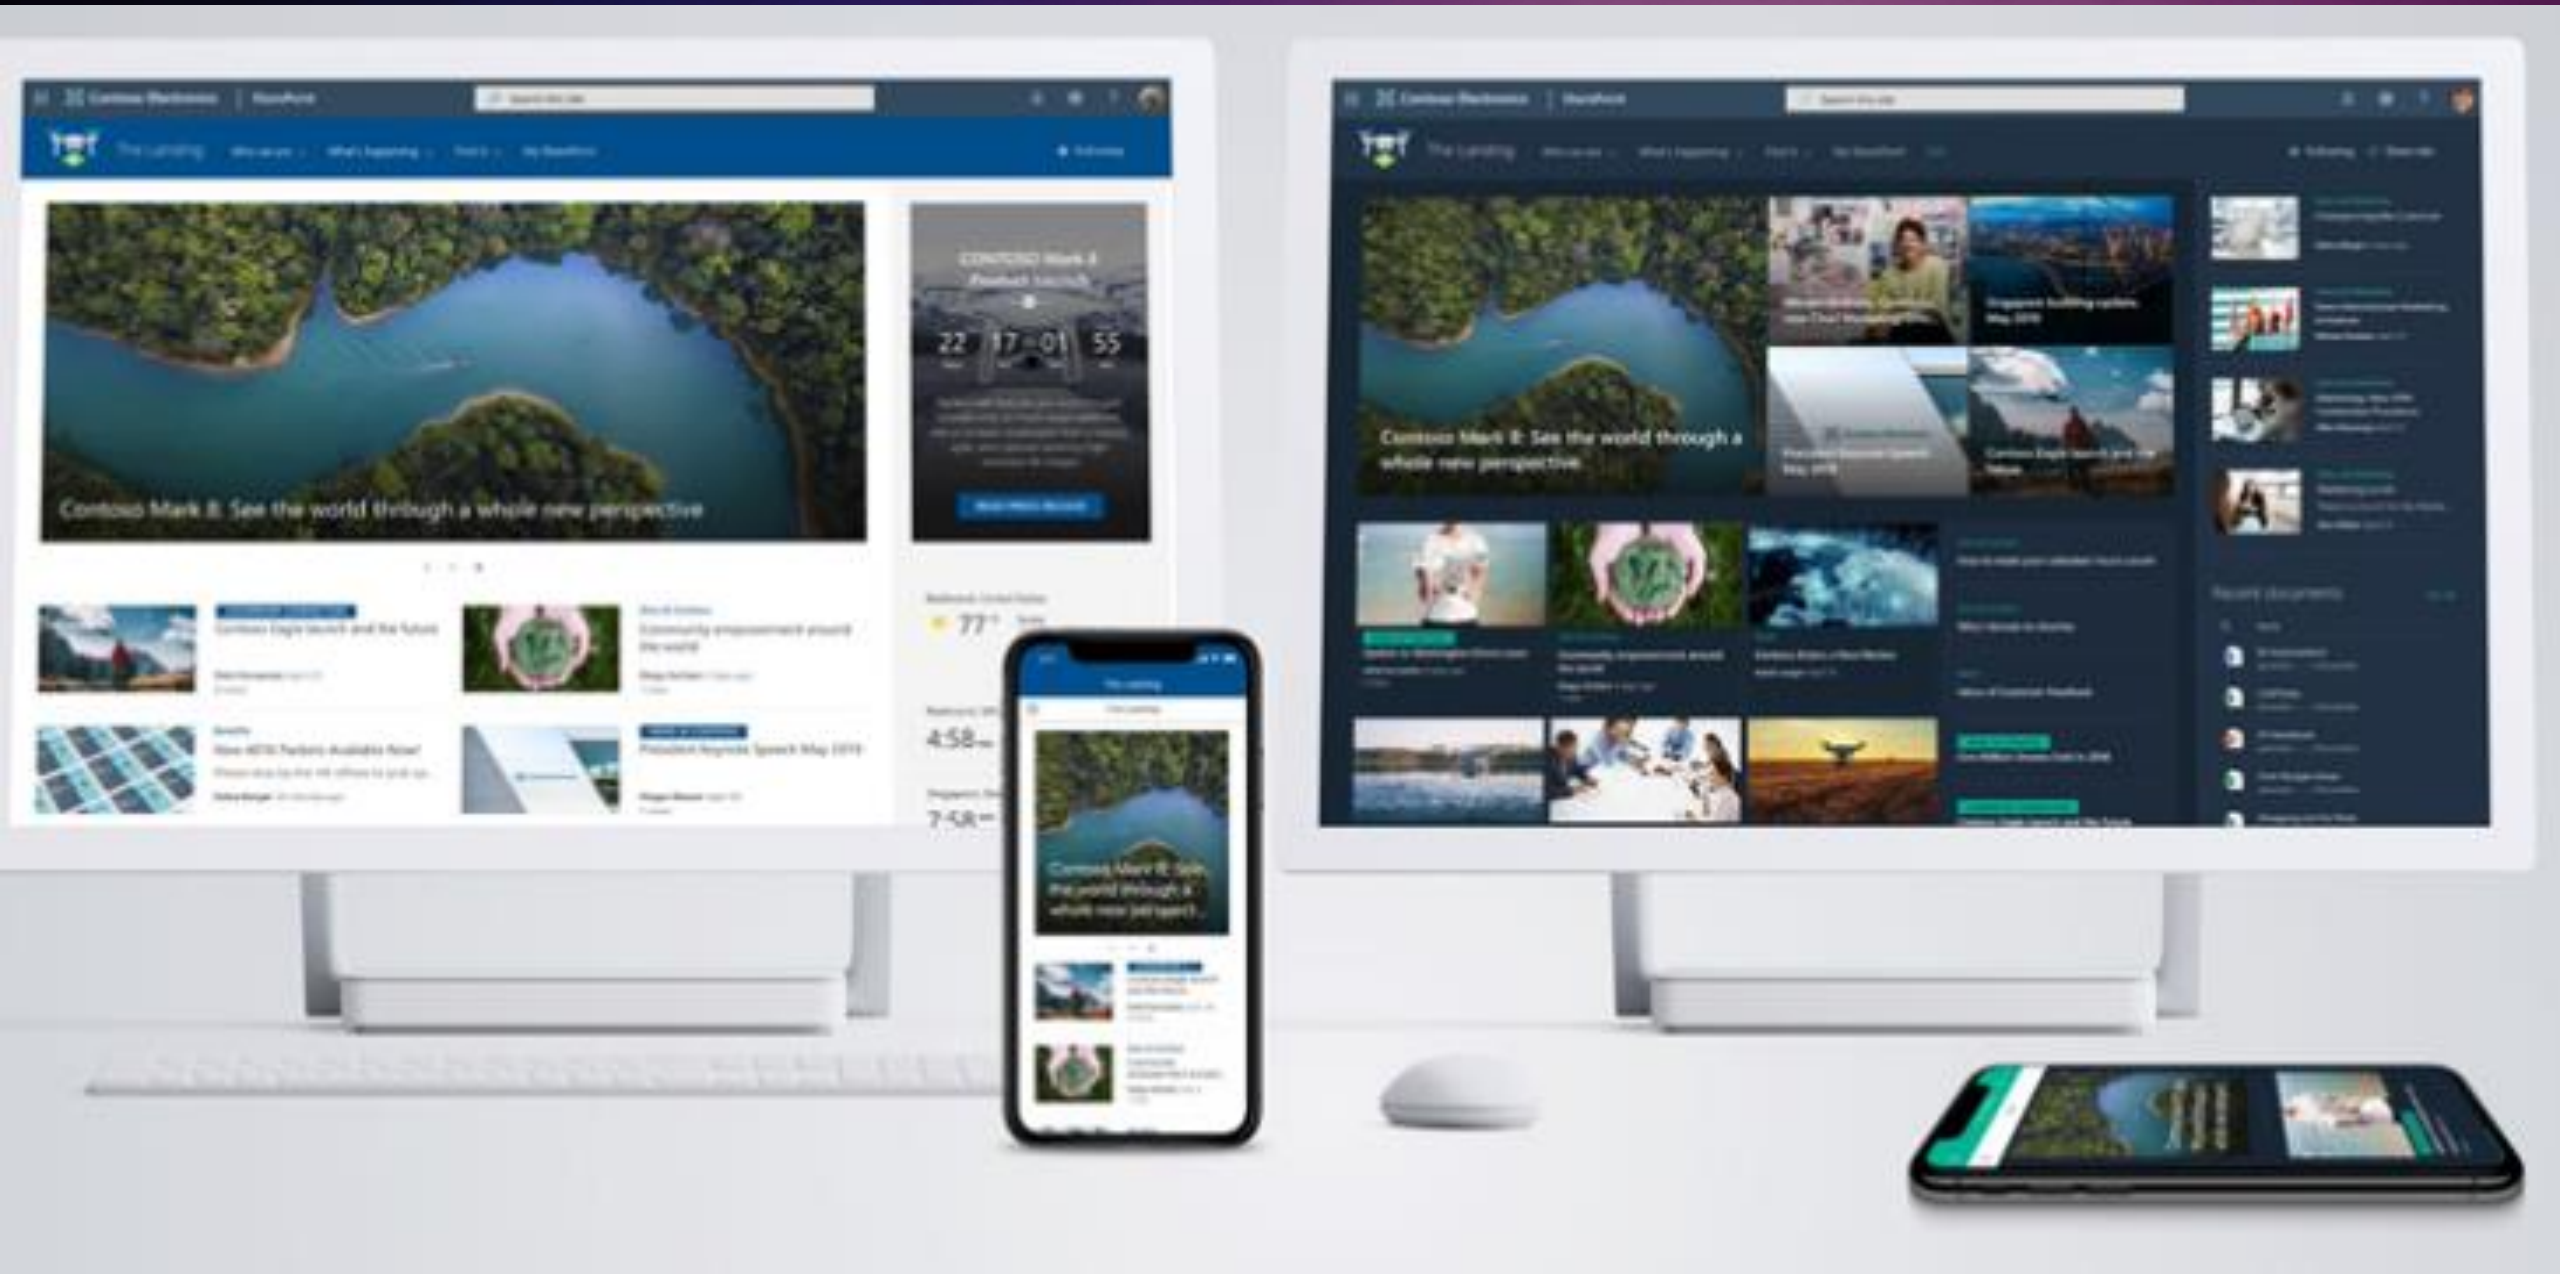
- 4th Age – Digital
- Data is the new Currency
- Telecommuting is the new norm – Working anywhere
- AI infused into everything
- Teams work fast and Agile
- MS Teams – Fastest growing app ever (500,000 Organisations)
- 180 Million people use O365 Now..
- 20yrs since Jeff Teper ran the initial build of SharePoint (under his desk)
- MS SharePoint is the worlds biggest Azure Customer / Consumer

SharePoint

SharePoint – Home Sites (Jul – Sept)

- Home Sites are "a communication site that is designed and designated to serve as the top portal"
- SharePoint home sites are the new landing sites and are built on a Comms site. This new type of communication site brings together news, events, content, conversations, and video, in order to reflects priorities and brand. This is a complete, built in intranet right there in Office 365. News, personalised content, engaging videos, intelligent search, and accessibility and responsiveness.
- A Home Site differs from a Communication Site in that an organization's "official" news gets shown by default and the landing page is connected to a user's SharePoint home page. The page features the so-called "megamenu layout" for navigation by users, which shows the whole menu instead of using flyouts.
- It's possible for a Home Site to be a Hub Site, per a FAQ in this Home Site announcement.
- Microsoft is planning on making Home Sites the new home page for the SharePoint Mobile App.
- IT pros can make a Communication Site become a Home Site via "a PowerShell command." Typically, organizations would create one Home Site per Office 365 tenancy, Microsoft indicated.

SharePoint – Home Sites



Site Design Wizard

- New Starter Site design Wizard coming with layout options such as "a vertical section" and "new webparts.“ This will provide greater functionality in page layout and design

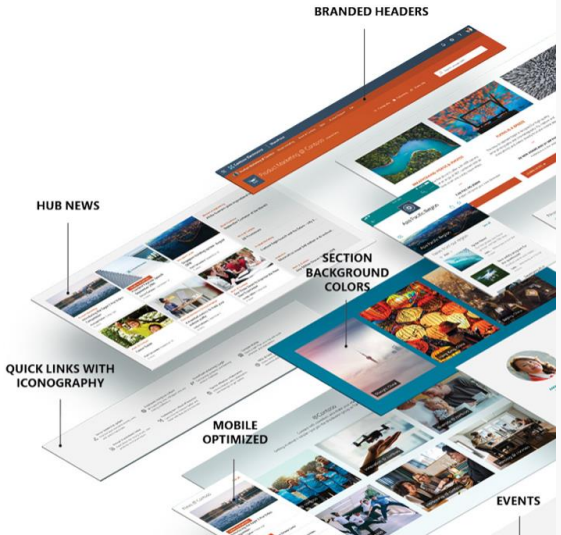
SharePoint Look Book - Updates

- Microsoft Design Examples of Modern Sites
- Administrators can use the SharePoint Provisioning Service to automatically provision SharePoint Look Book designs to any tenant.

LOOK BOOK
SharePoint

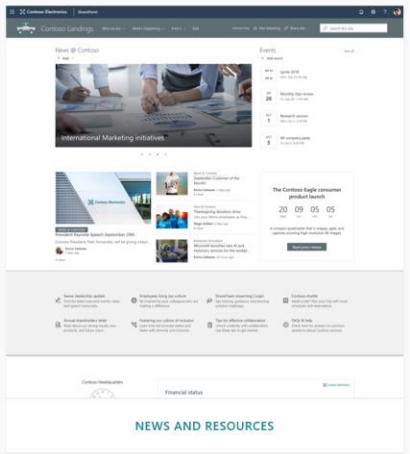
Get inspired. Discover the modern experiences you can build with SharePoint in Office 365.

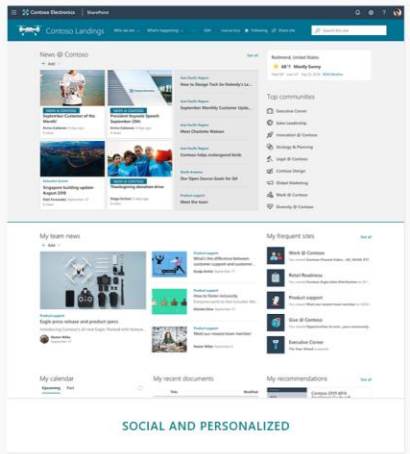
VIEW EXAMPLES DOWNLOAD LOOK BOOK PDF

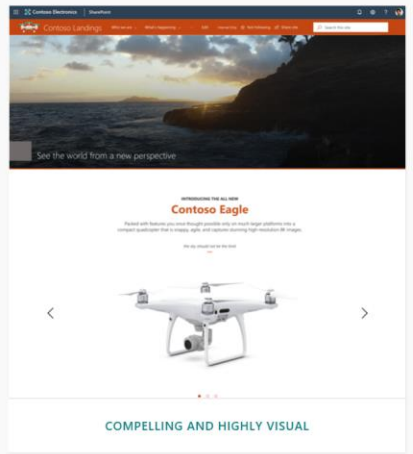


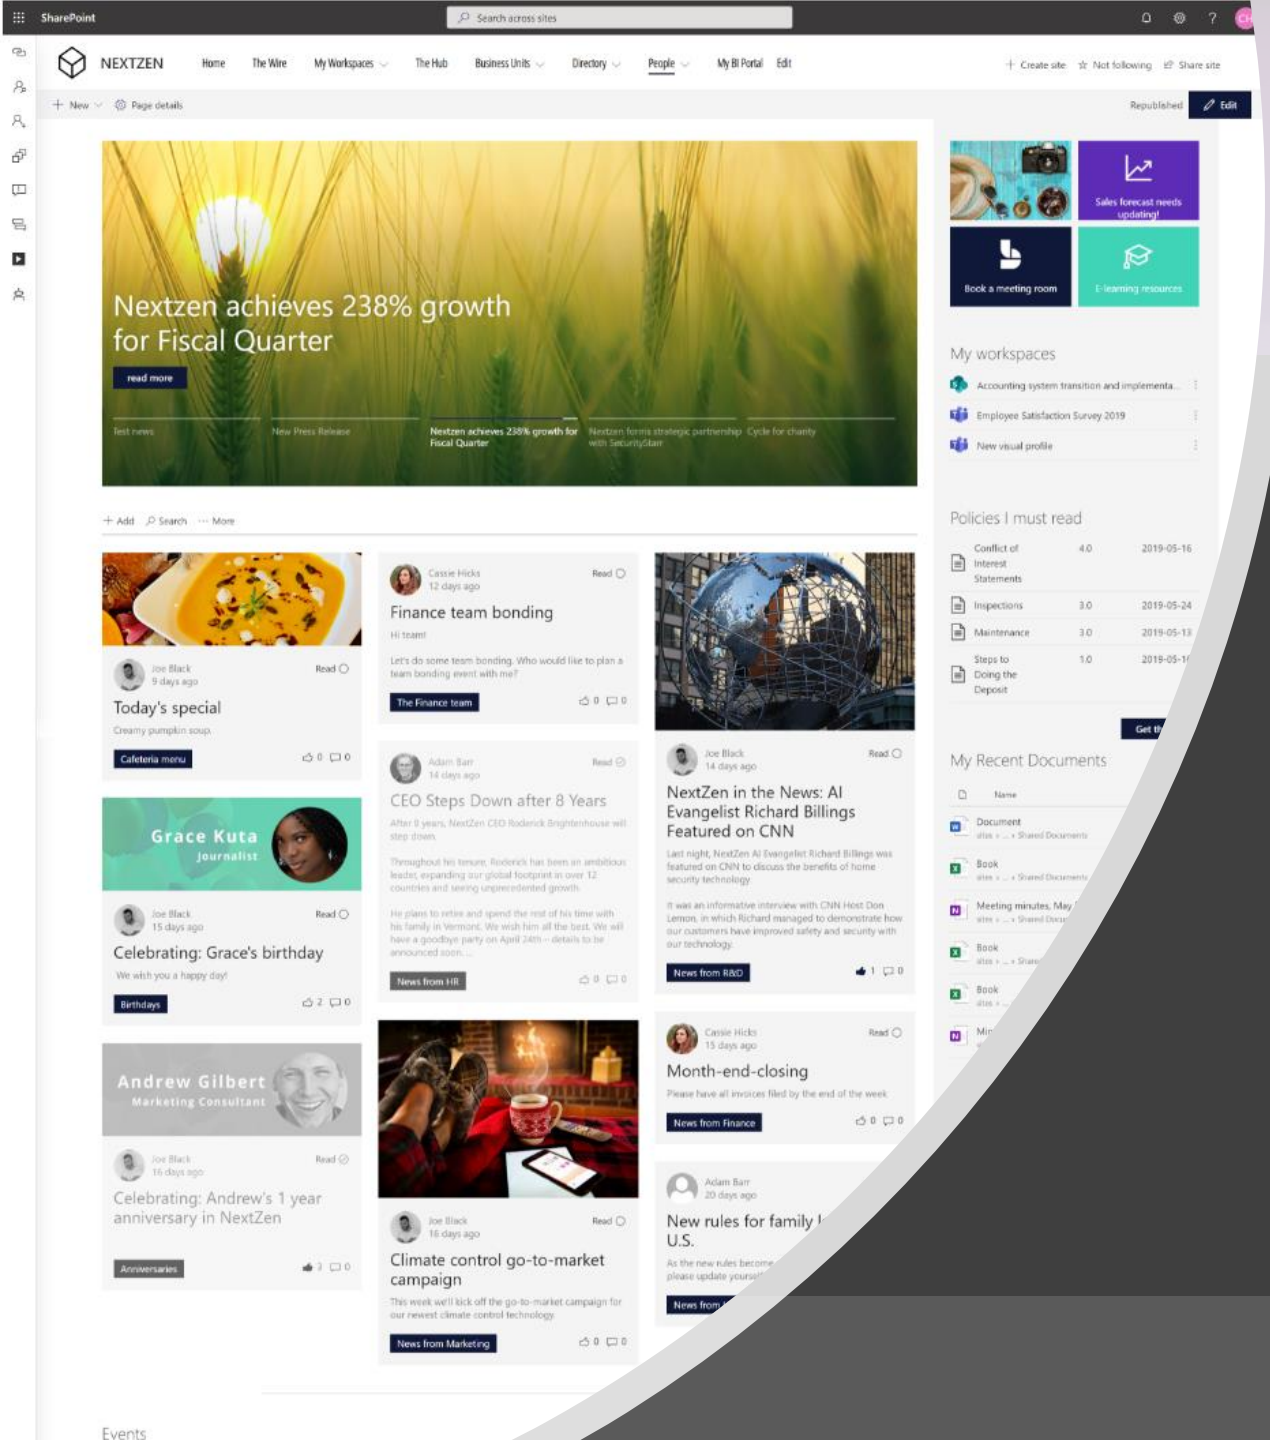
Intranet homepage

Your intranet homepage is the place where people in your organization can get informed, get inspired, and discover news and resources.









Home Sites – Wizdom Example

Home Sites – Wizdom Benefits

- Policy and Procedure Management – Admin, Author, User Level
- Centralised Governance
- Site Provisioning (LT, Wiz or 365 Object)
- Personalisation (Subscribe to their own news, information)
- Wizdom Mobile Application (Policy Management)
- Standardised Branding Control – Tenant Wide (HTML, CSS)
- Power Panel – Follows your browser experience
- Mega Menu – Wasn't available OOB in Office 365 (UserVoice Request)
- Accelerator – Intranet in a box capability (1hr)
- Innovation App Functionality
- Replace Users – Page Owner (Auto Update Admin Tool)
- Forget Users – GDPR Protection (to make a user Anonymous)

SharePoint Spaces

- SharePoint Spaces, a way of building 3-D SharePoint Online sites that provide mixed-reality experiences for users wearing headsets. At this year's event, Microsoft showed off the use of SharePoint Spaces for viewing its "campus" headquarters, as well as Microsoft's new construction plans.
- More than 1,800 companies have applied to use the "limited preview" of SharePoint Spaces, but Microsoft is currently just working with a "handful of those customers" to develop the SharePoint Spaces feature. The company is planning to share more about SharePoint Spaces at the Microsoft Ignite event coming this year in November.

SharePoint Start Page

The start page is all about "me", and will contain content relevant to yourself, with items such as featured links, recent documents, and saved files. This is the personalized place that anyone can go, to see what they are working on, and quickly access their files and favourite sites

SharePoint Migration Tool

The SharePoint Migration Tool, used to move local sites to SharePoint Online, has a SharePoint Server 2013 site migration capability that's now generally available. Microsoft described it as a "comprehensive solution for migrating your SharePoint Server 2013 sites and their settings and content." There's also a SharePoint Server 2010 migration capability for moving content to SharePoint Online in Office 365, but it's still at the preview stage. The SharePoint Migration Tool now has support for 11 languages, Microsoft indicated.

SharePoint – Azure Stack

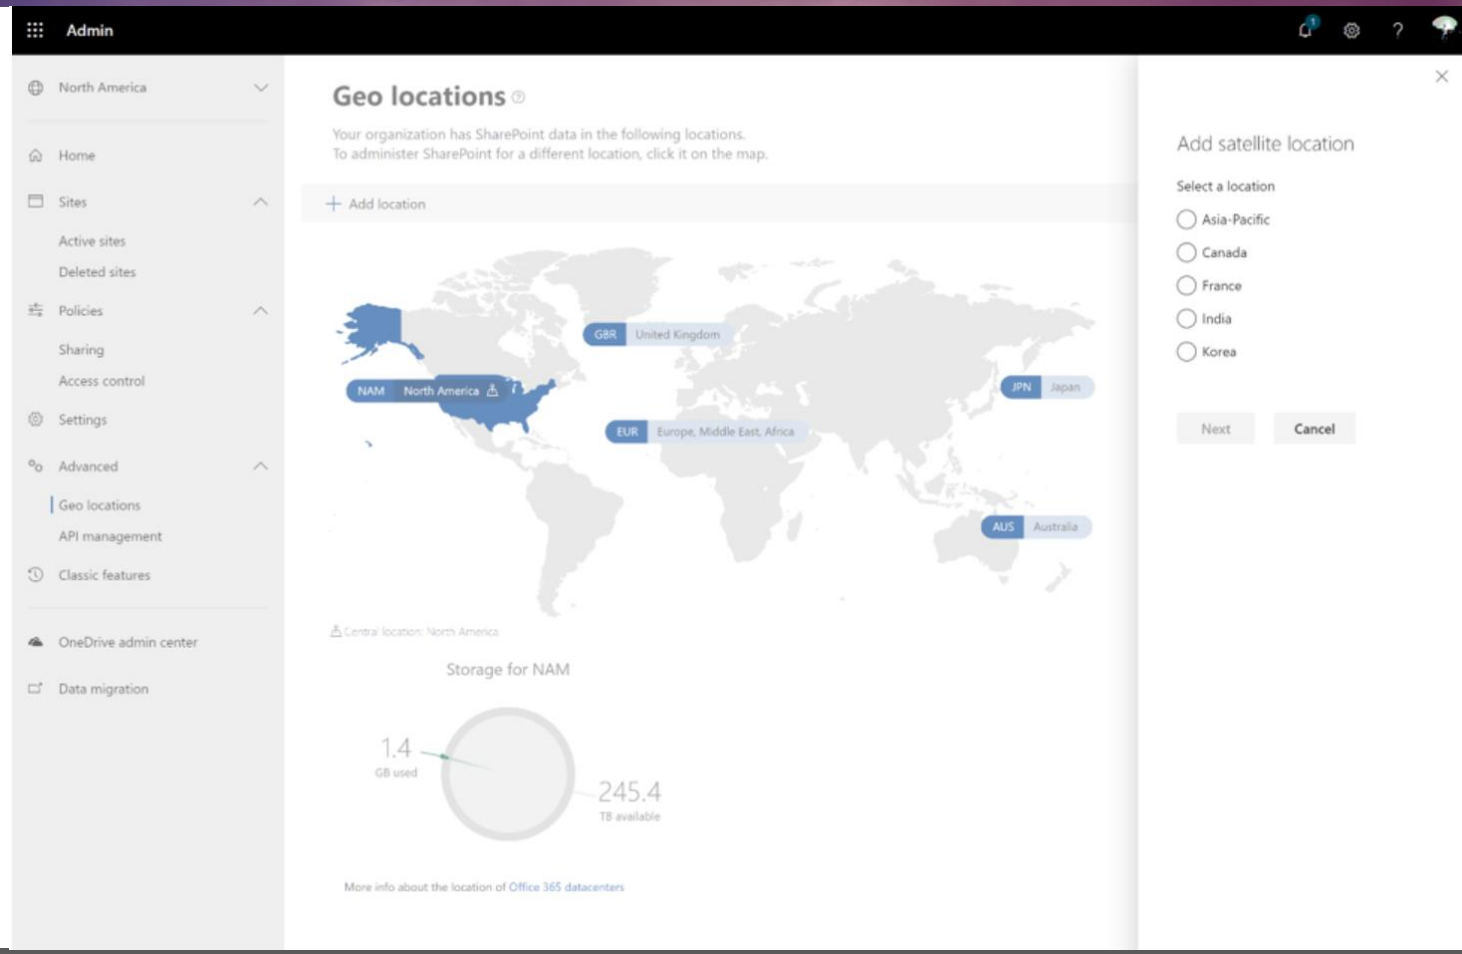
- What is Azure Stack?
  - **Azure Stack** is a hybrid cloud computing software solution developed by Microsoft based on the company's **Azure** cloud platform. **Azure Stack** is "datacentre in a box appliance" designed to help organizations deliver **Azure** services from their own data center.
- Support for running Azure Stack on SharePoint Server 2016 or SharePoint Server 2019 was discussed, although the timing wasn't advised.

SharePoint Search updates

- Search is everywhere – M365, Office, Desktop, mobile app, Teams SharePoint or OneDrive
- The Fluid Framework, expected to arrive later this year with an SDK, will enhance user collaborations on documents in near-real time across Office applications
- Dec 2019, custom refiners, custom verticals, display templates and more extensibility, more scale, more content types, inline @Office help assistance, machine teaching, Custom adaptive cards, curation of search results and more. The search index will also be faster.
- Content will be searchable within 15 seconds of an addition or change.

Multi-Geo Capability

- New Multi-geo capabilities for SharePoint and Office 365 groups,
- Store your sites' data in one or more worldwide locations that you select.
- Satisfies data sovereignty requirements for those locations.
- Limit is now >500 Users

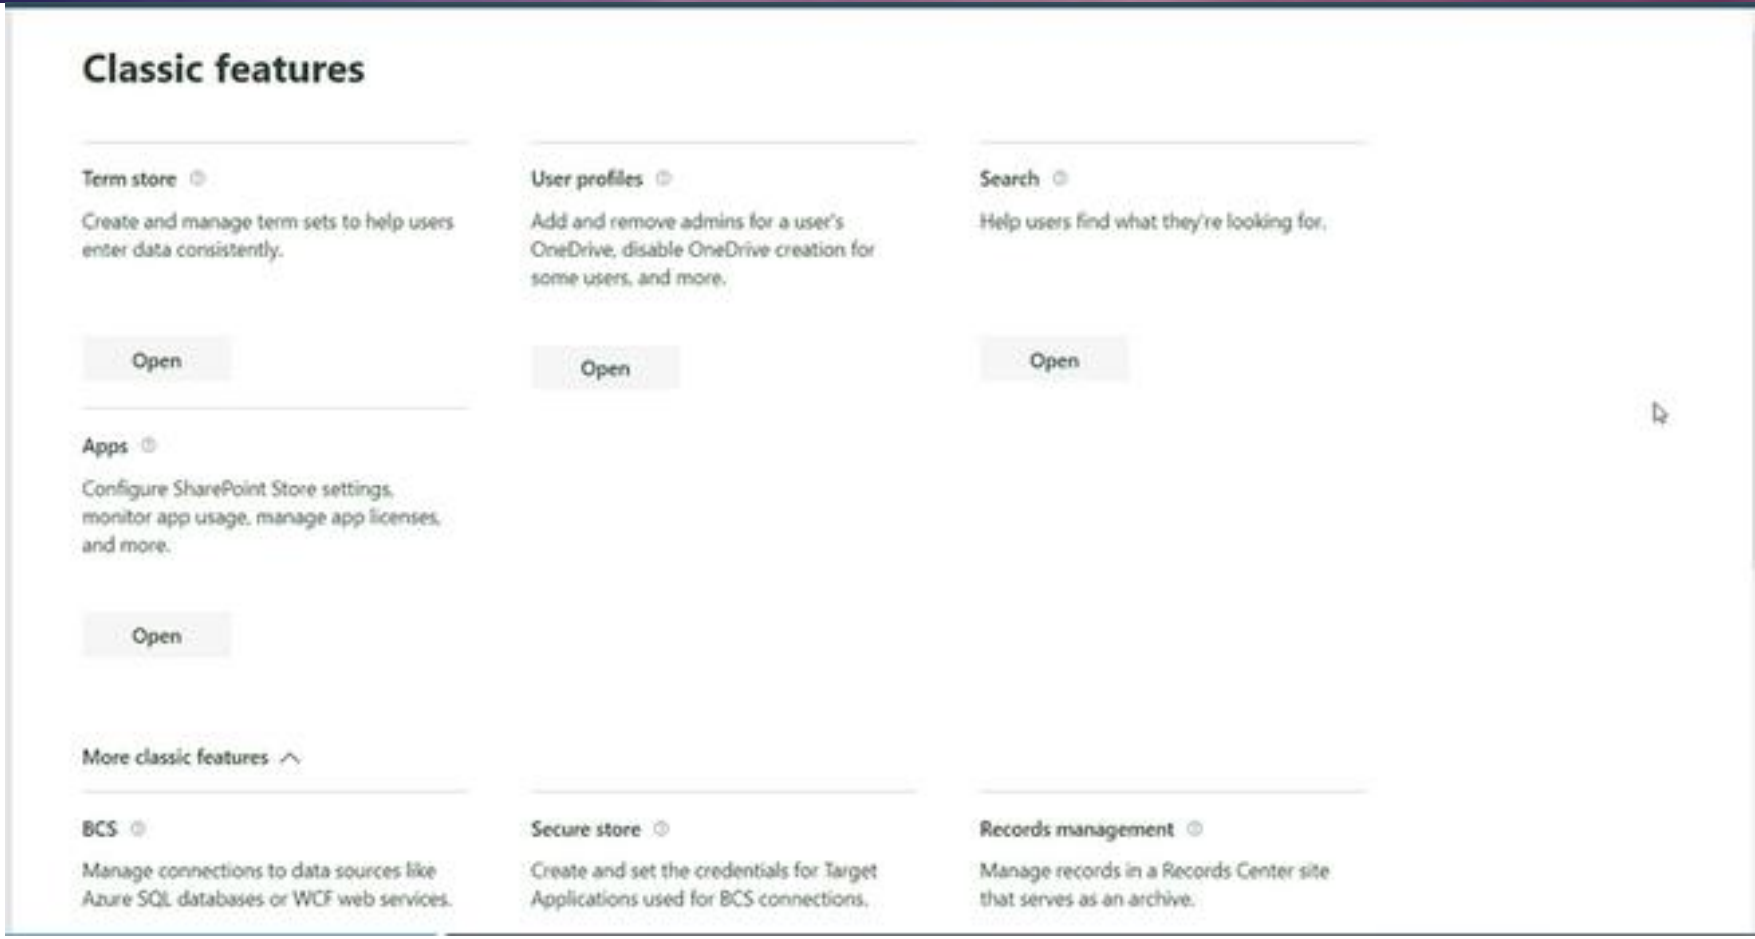


SharePoint – Admin Center Updates (intro)

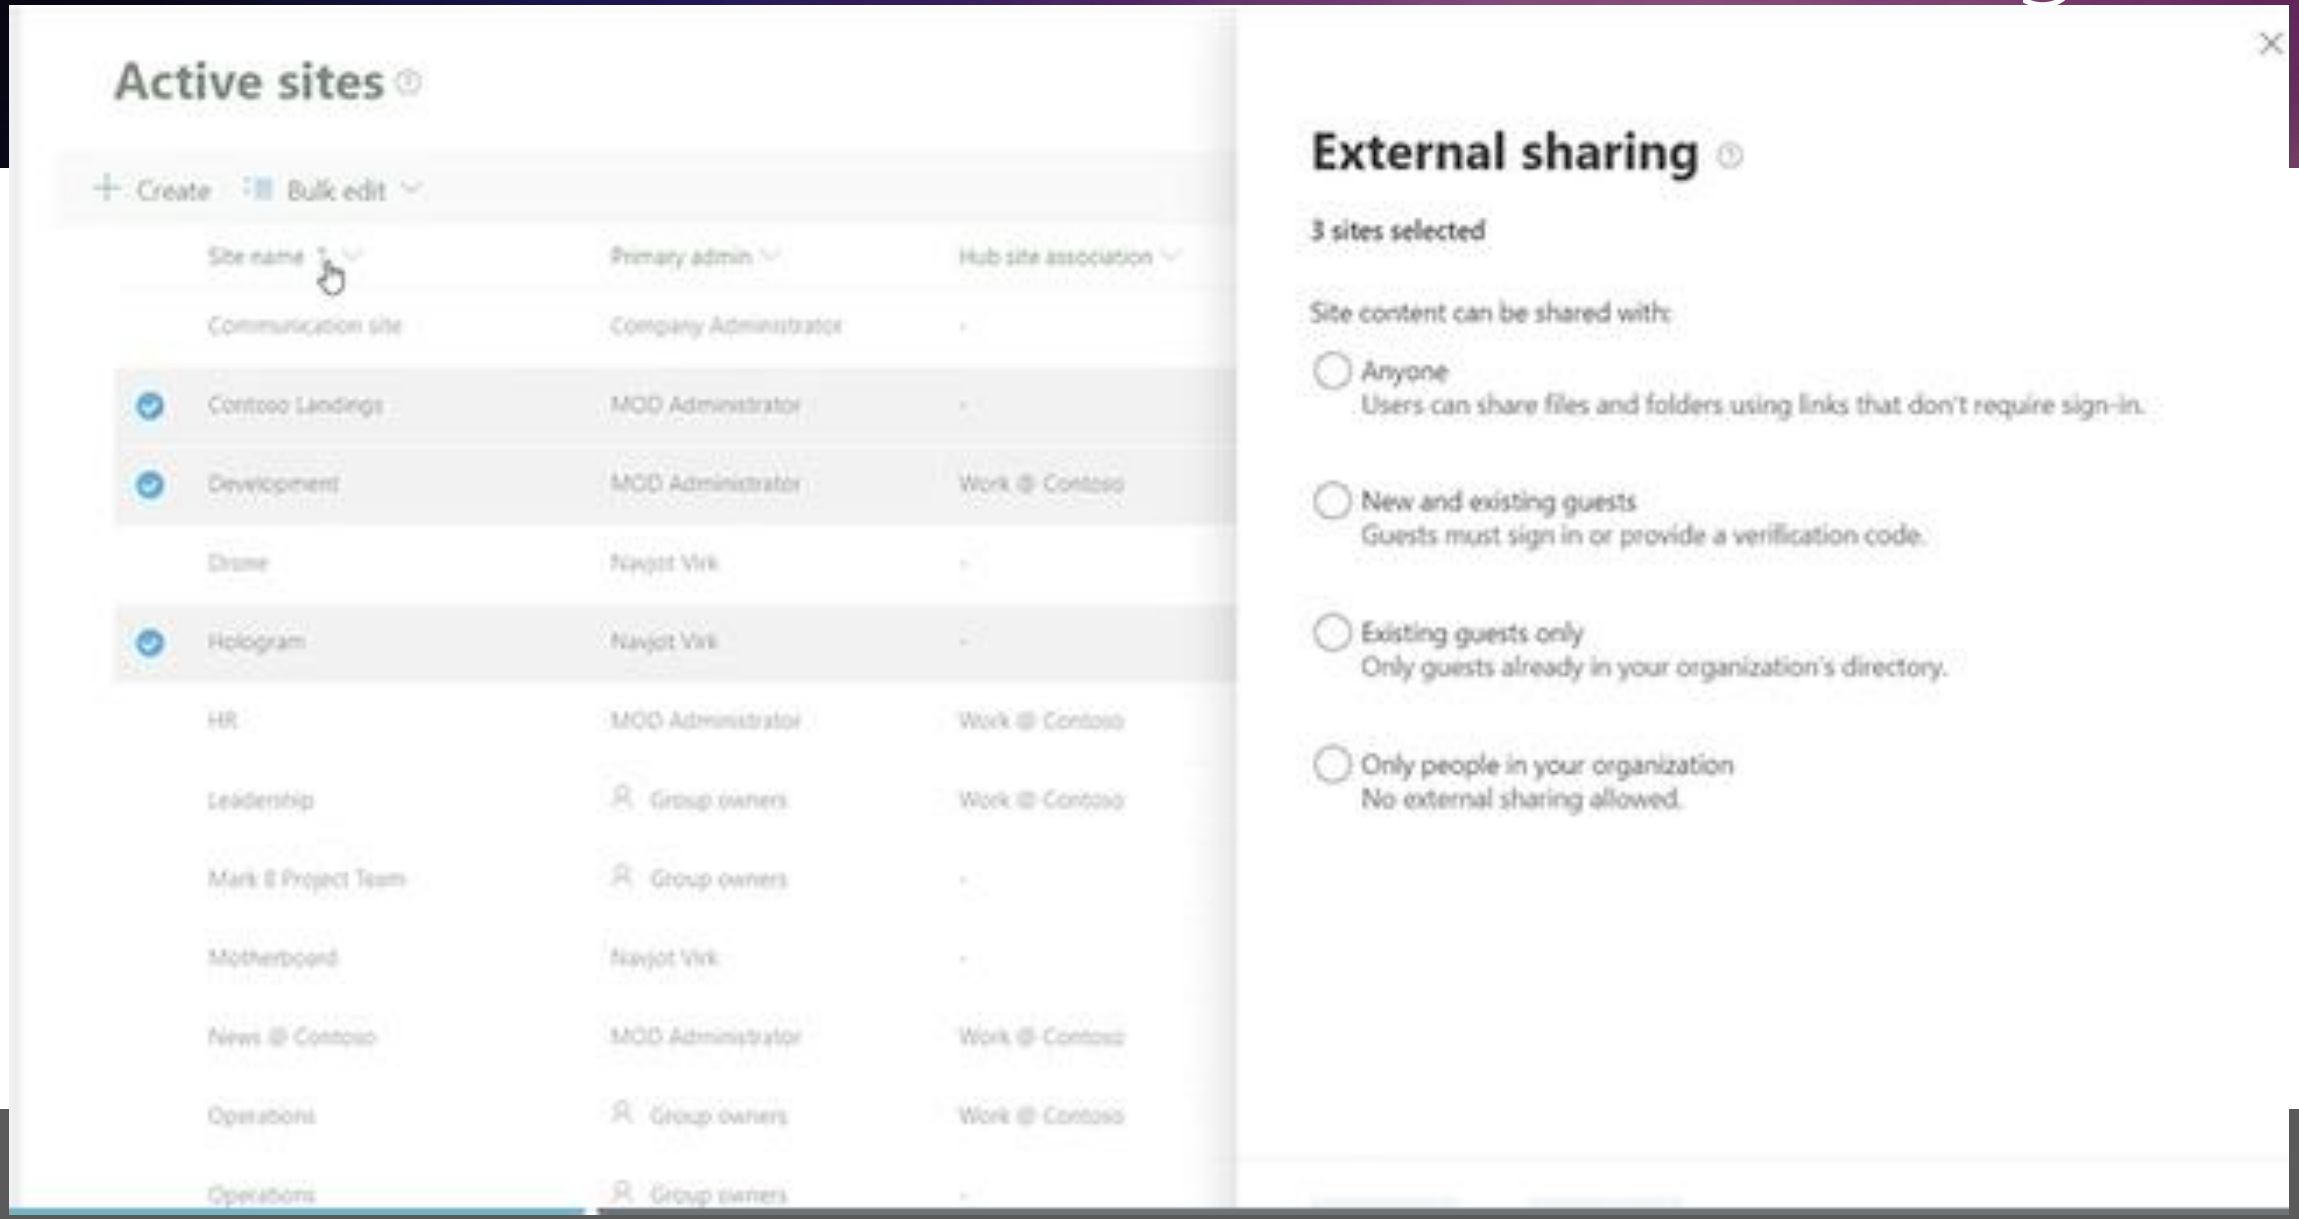
- Classic Vs Modern Settings
- Bulk Site Management
- Sensitivity / Privacy Labels across 365 Applications (coming later 2019)
- URL Renaming of Sites - PowerShell cmdlet (invoke-spositeswap)

SP Admin Ctr – Classic Vs Modern settings

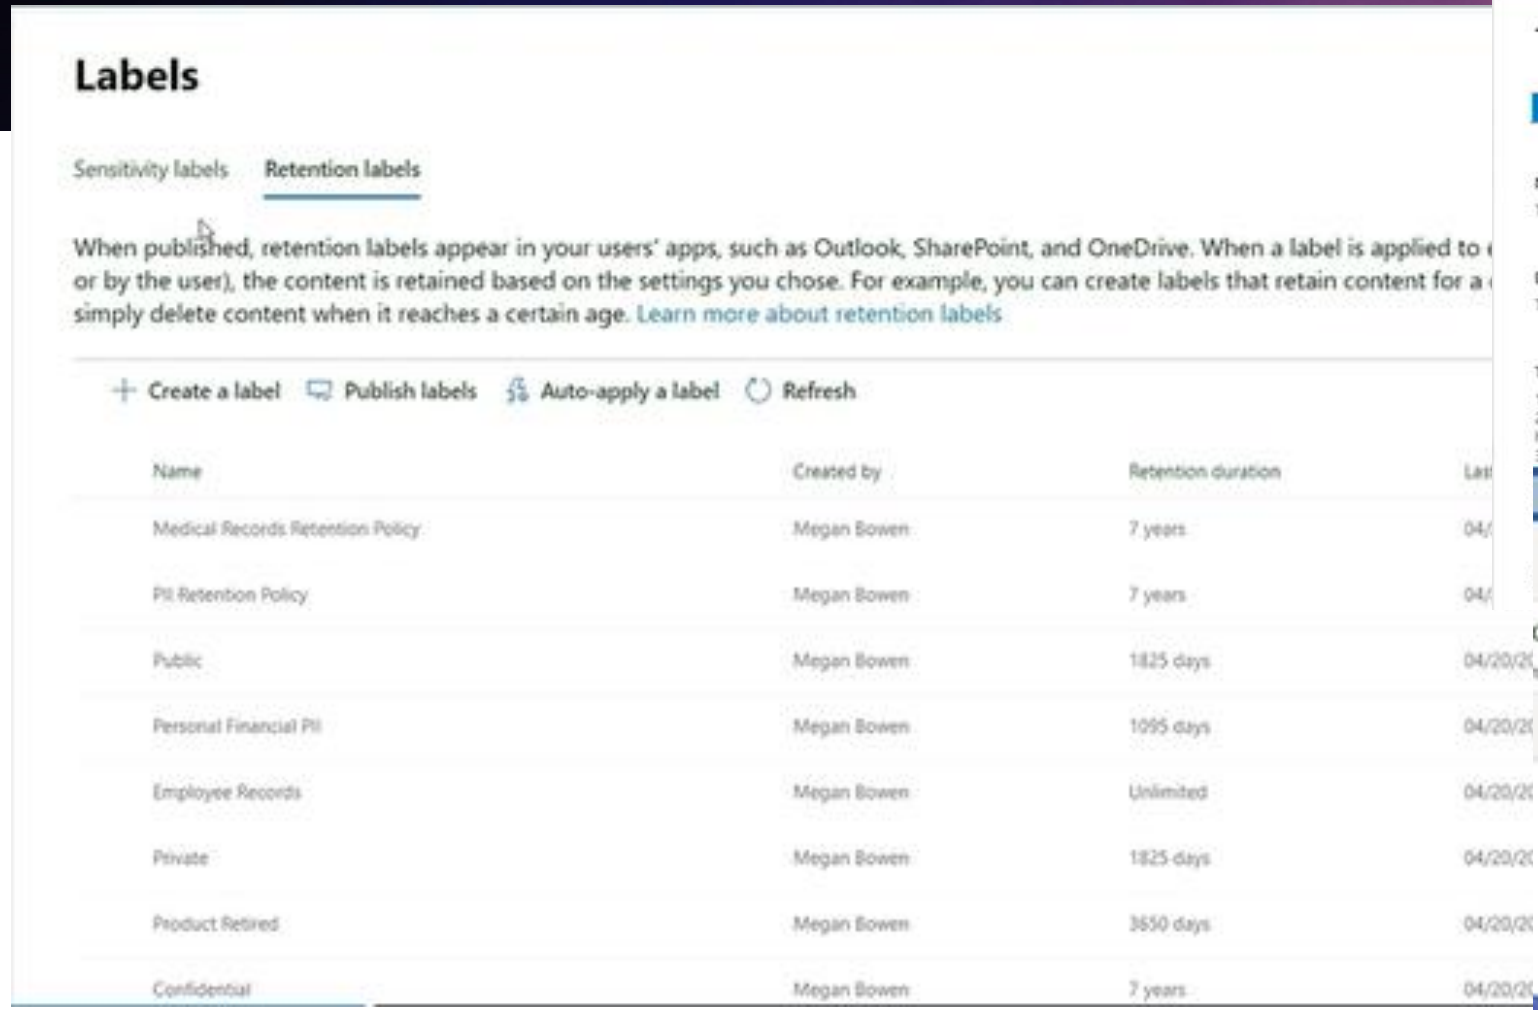
The SharePoint Admin Center – Classic and Modern = Feature Parity

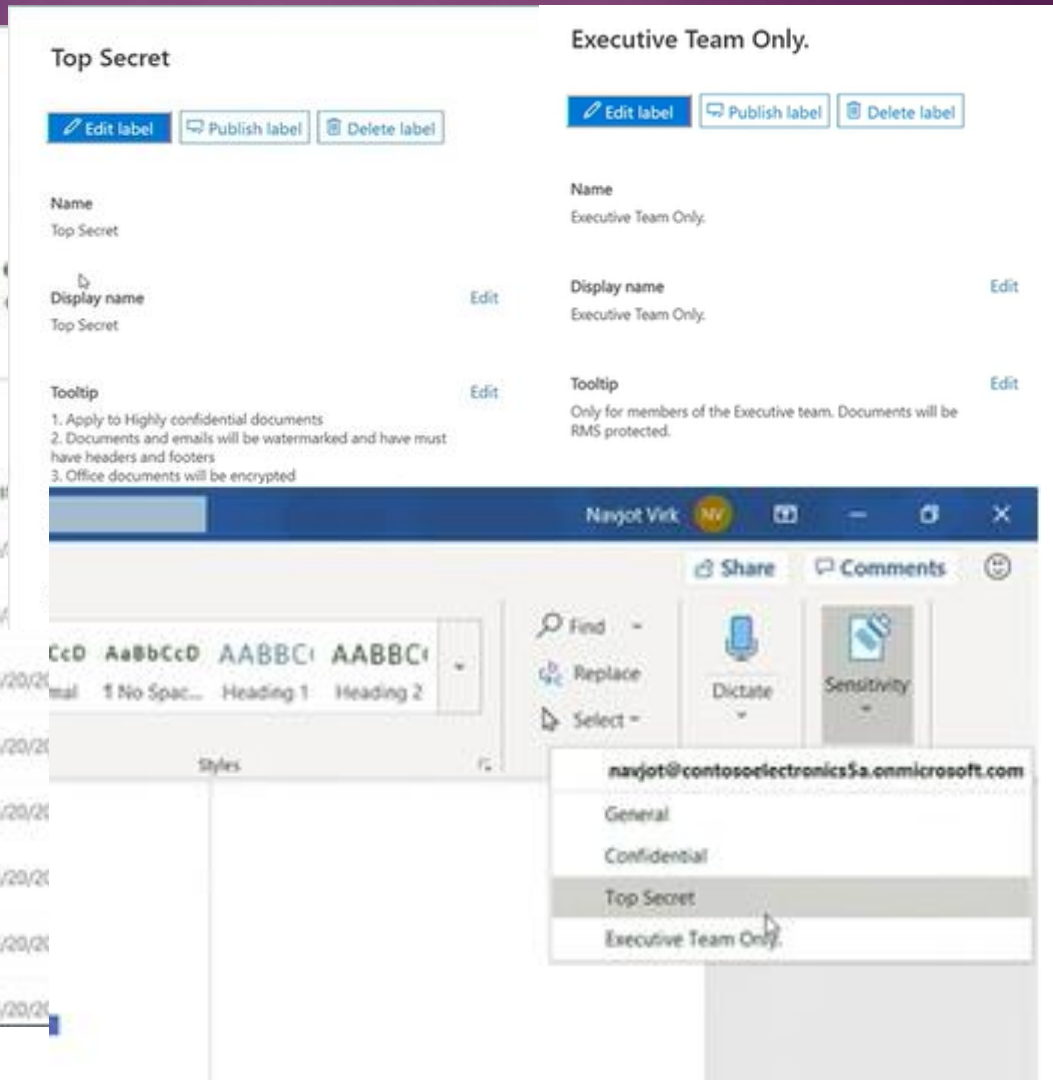


SharePoint Admin Center – Bulk Site Mgmt

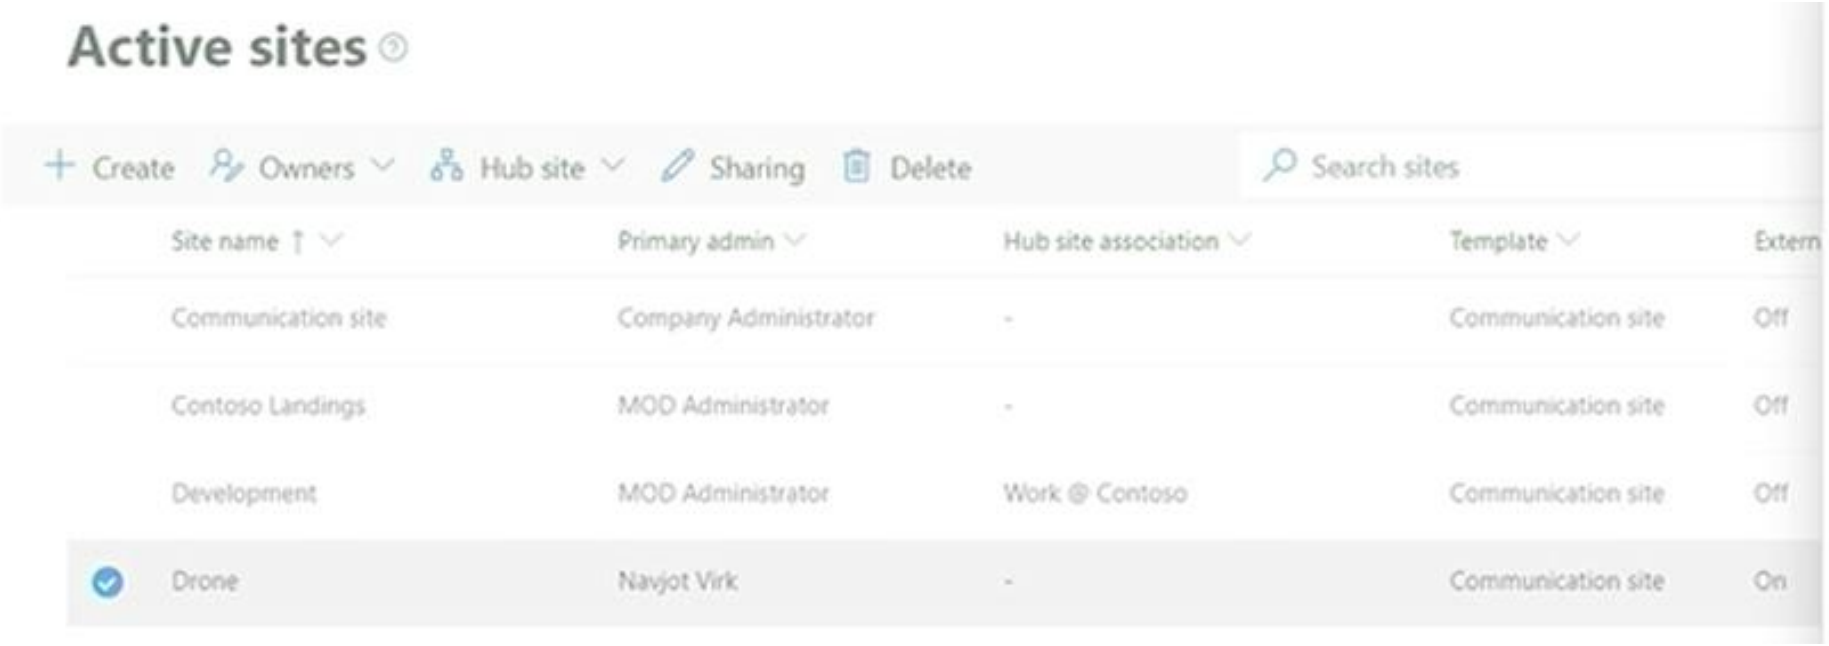


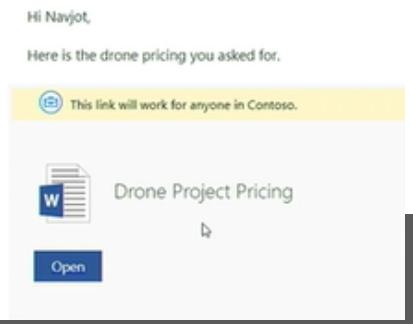
Classification - Sensitivity and Retention Labels

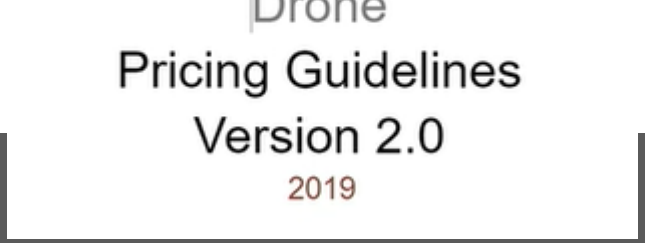




SharePoint Admin Center – Site URL Rename



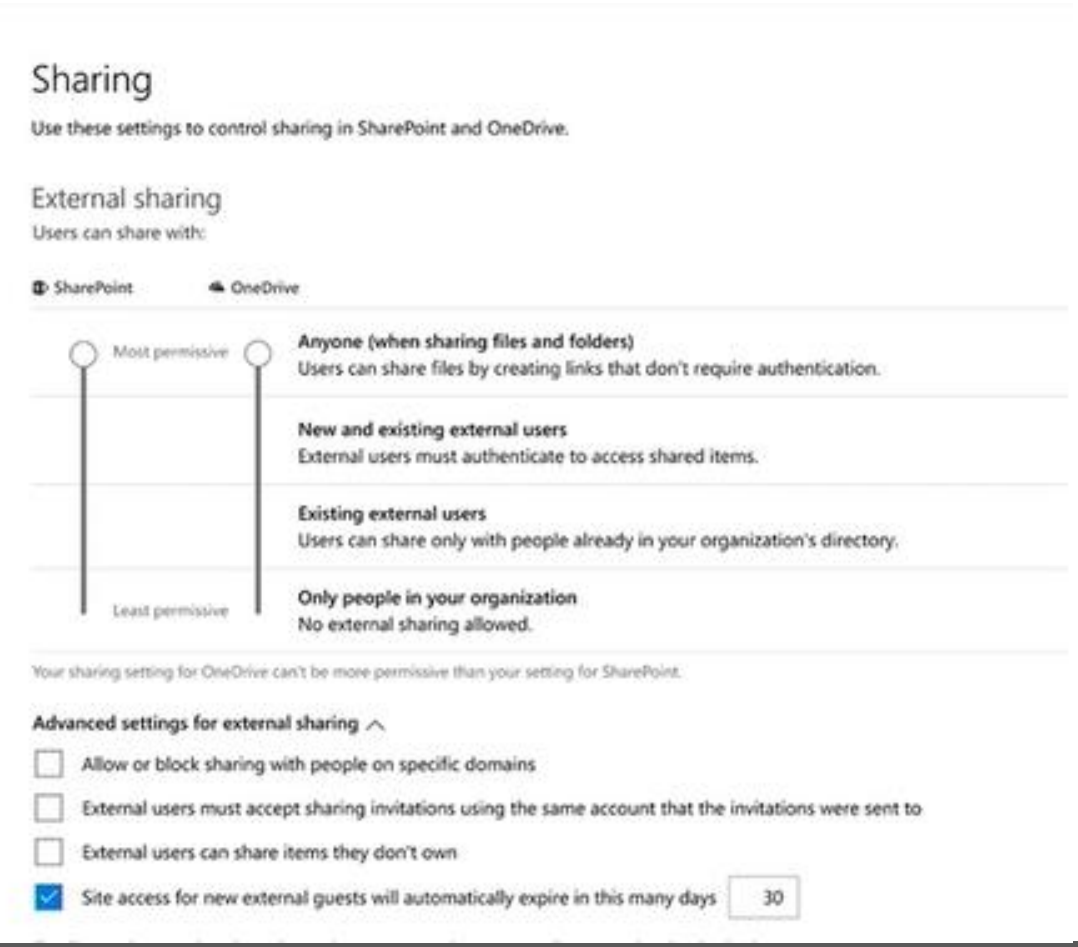


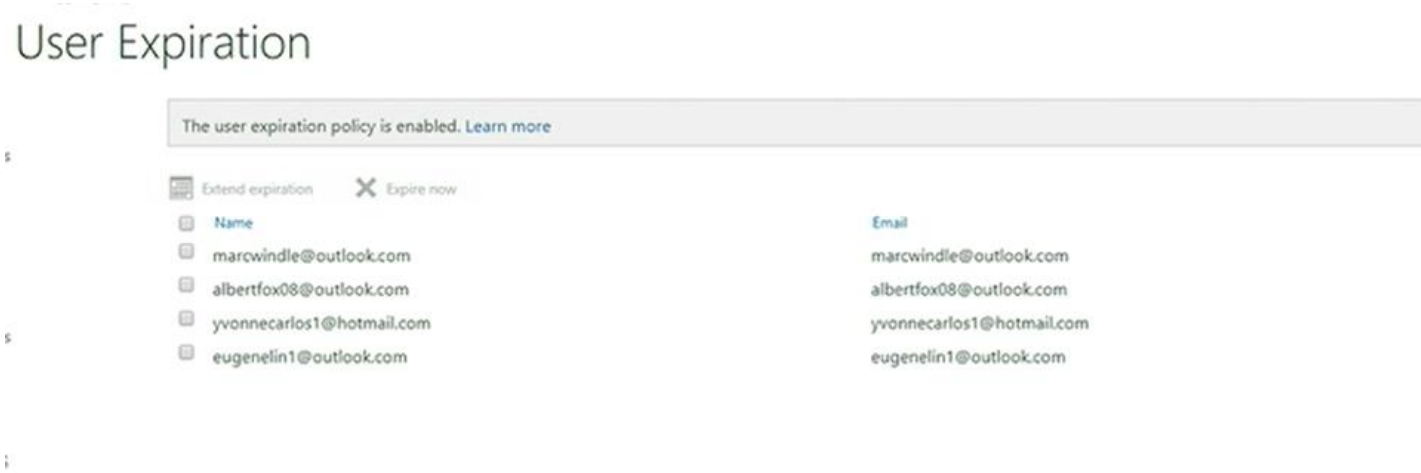


SharePoint – Compliance Portal

- Microsoft 365 is getting new records management capabilities.
  - Document retention periods "across SharePoint, OneDrive for Business, Teams, Exchange and more." Users can see a review of "bulk disposition, retention extensions, or re-classifications." Microsoft also added "native connectors" that can be used to archive non-Microsoft 365 data, such as social media data from Facebook or Twitter.
- Also coming soon is a machine learning "classifier" capability that will indicate when offensive language has been used. Other classifiers in the works include "attorney client privilege, resume and source code," plus a "classification assistant" that organizations can train for their own compliance purposes.

External Sharing Management

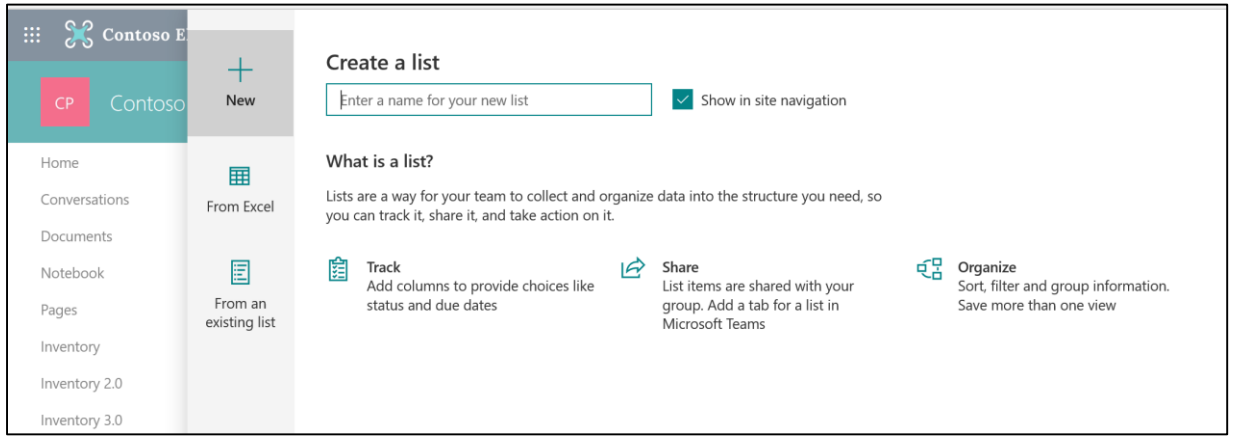




- Preview Q3 2019
- Tenant Level – External Sharing Expiration timeframes

SharePoint List and Libraries

- List from list and list from an Excel
  - Rolling out now
  - New List from existing list (schema-only)
  - New List from Excel
- Improved Quick Edit
  - Coming soon
  - Performance Improvements
  - UI consistency with modern:
    - Column headers, People Picker
  - Filters Pane
  - Column Formatting
  - Preserve Sort and Filter from main view



Product ID	Product Price	Store Location	Vendor	Vendor Personnel	Corporate Discount	In stock	Units sold

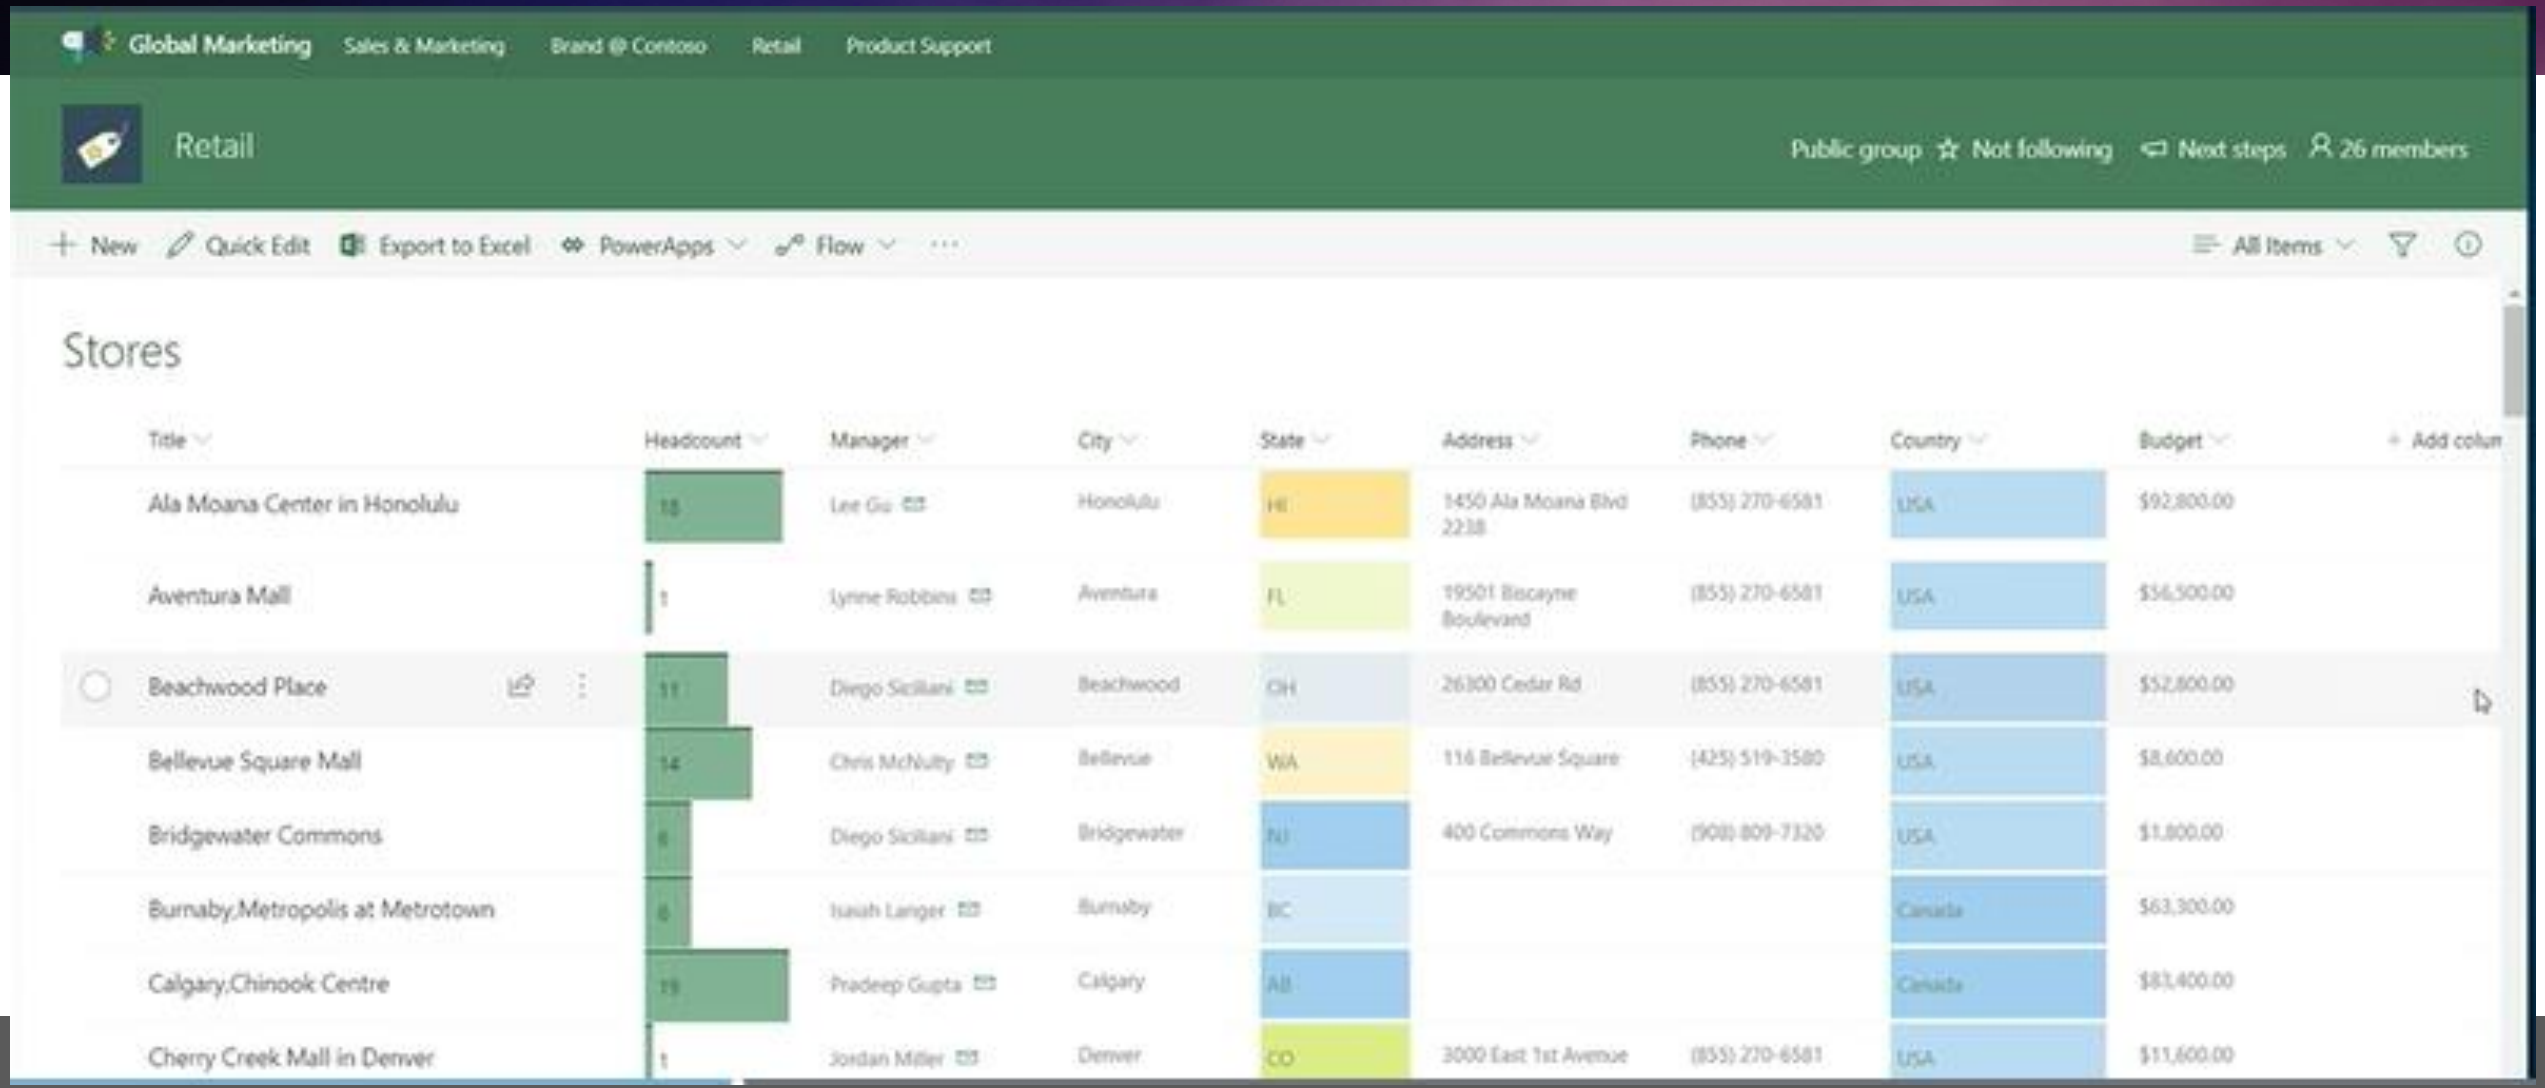
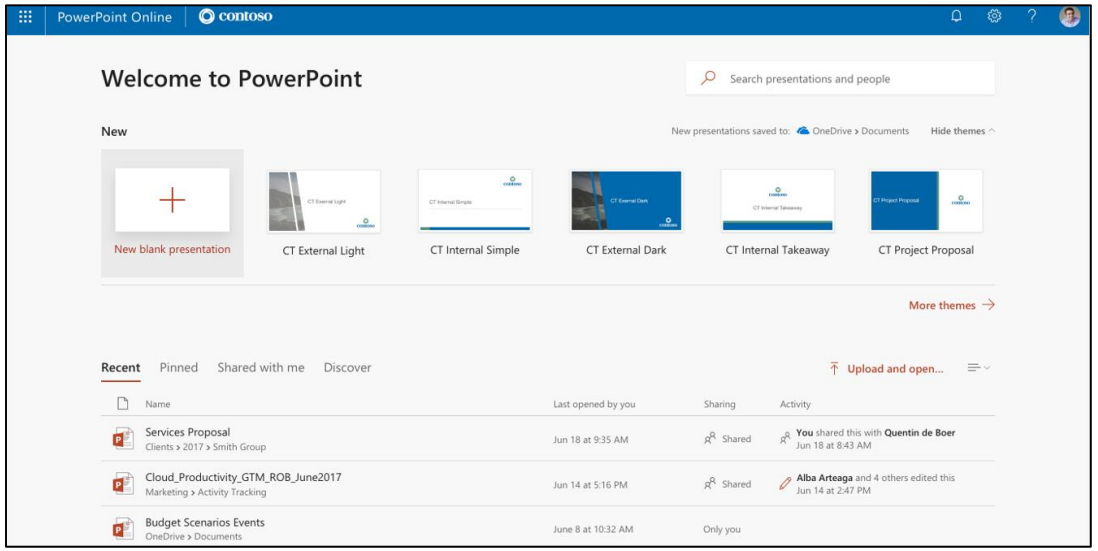
Custom List Import Functionality



SharePoint team sites – home pages

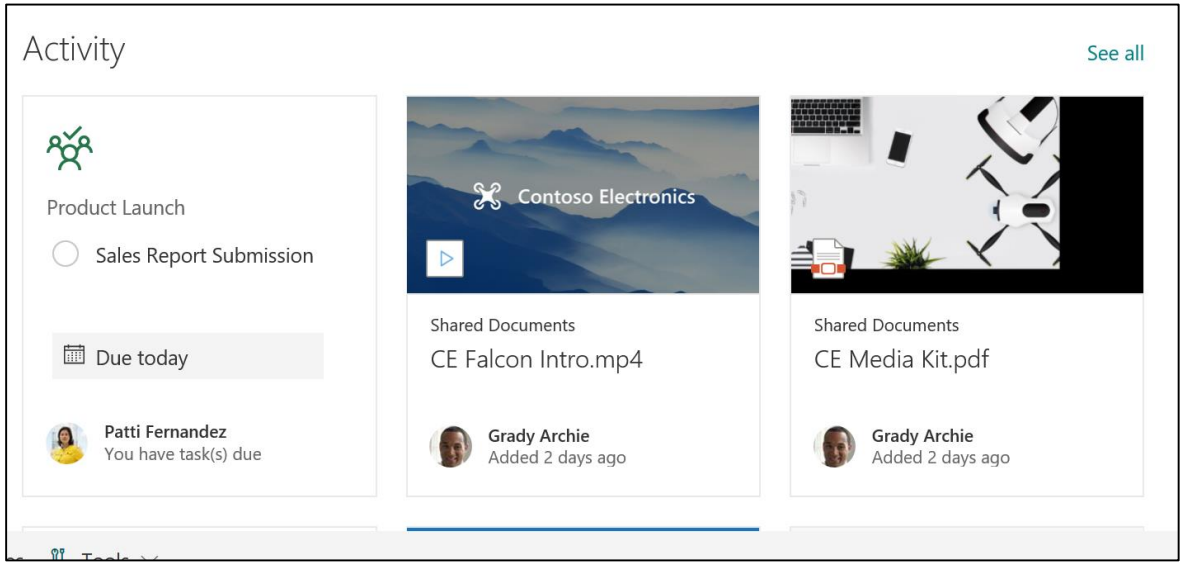
- Available Soon

- New files experience in Teams and One Drive
- Hub join Approval
- First run tips and tricks help for team site Owners
- Site navigation reorder via drag & drop



- Later This year

- Extract a site to a site design, including multiple lists, branding & navigation (using PowerShell)
- Office enterprise document templates
- Planner Cards in site activity



SharePoint List and Libraries

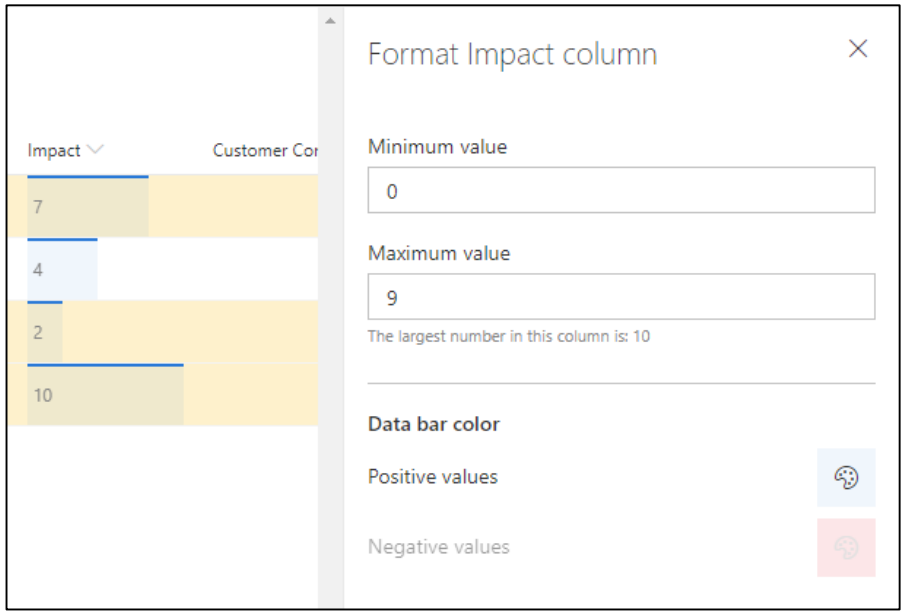
- Column and View Formatting

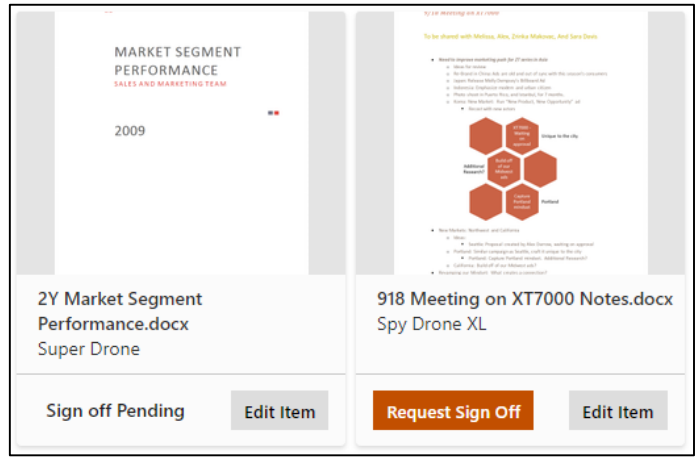
- Coming Soon

- Number Bar column formatting UI

- In Development

- Rule Builder UI for view and column formats
- Alternate Rows view style UI
- Rich text formatting UI
- Tile-Based View support in JSON
- Light Weight Form customizations
- PowerApps forms for document libraries





OneDrive

OneDrive Improvements

- OneDrive Differential Sync (later 2019) and Sharing Improvements
- 320+ Files Supported, including AutoCAD and 360 degree Images
- Windows Virtual Desktop – Sync Support coming
- Request files from others from within OneDrive, link straight to a specific PowerPoint slide, and @mention people in comments in Office files.
- Also, the Outlook mobile app also has some improvements to make collaboration easier, such as the ability when sending an attachment, to pick from your list of recent files, without the need to download to your device before sending.

Roadmap CY 2019: OneDrive for Business (M365)

• Available soon

- Recommended view on web
- File card (time to read, insights)
- Comments (non-Office files)
- 360° image previewer
- AutoCAD previewer
- Full-fidelity shared libraries
- Password-protected links
- External Sharing Reports
- Updated recent view-mobile
- Updated UI for PDF annotations
- New files experience (Outlook iOS)
- Incident deflection (sync client)
- Self-help (sync client)
- Upload file prompt (sync client)
- VDI updates (Files On-Demand on Windows Server 2019)

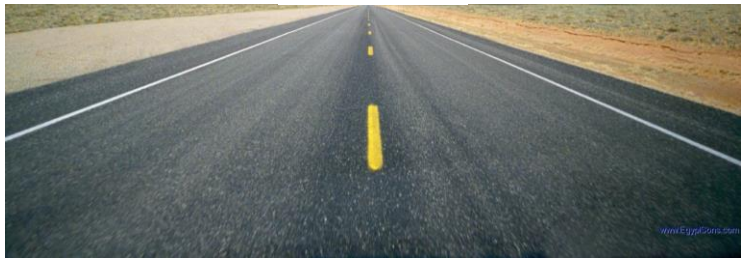
Sync health admin reporting

Dual-use value

Large file sizes

Metadata support

2019

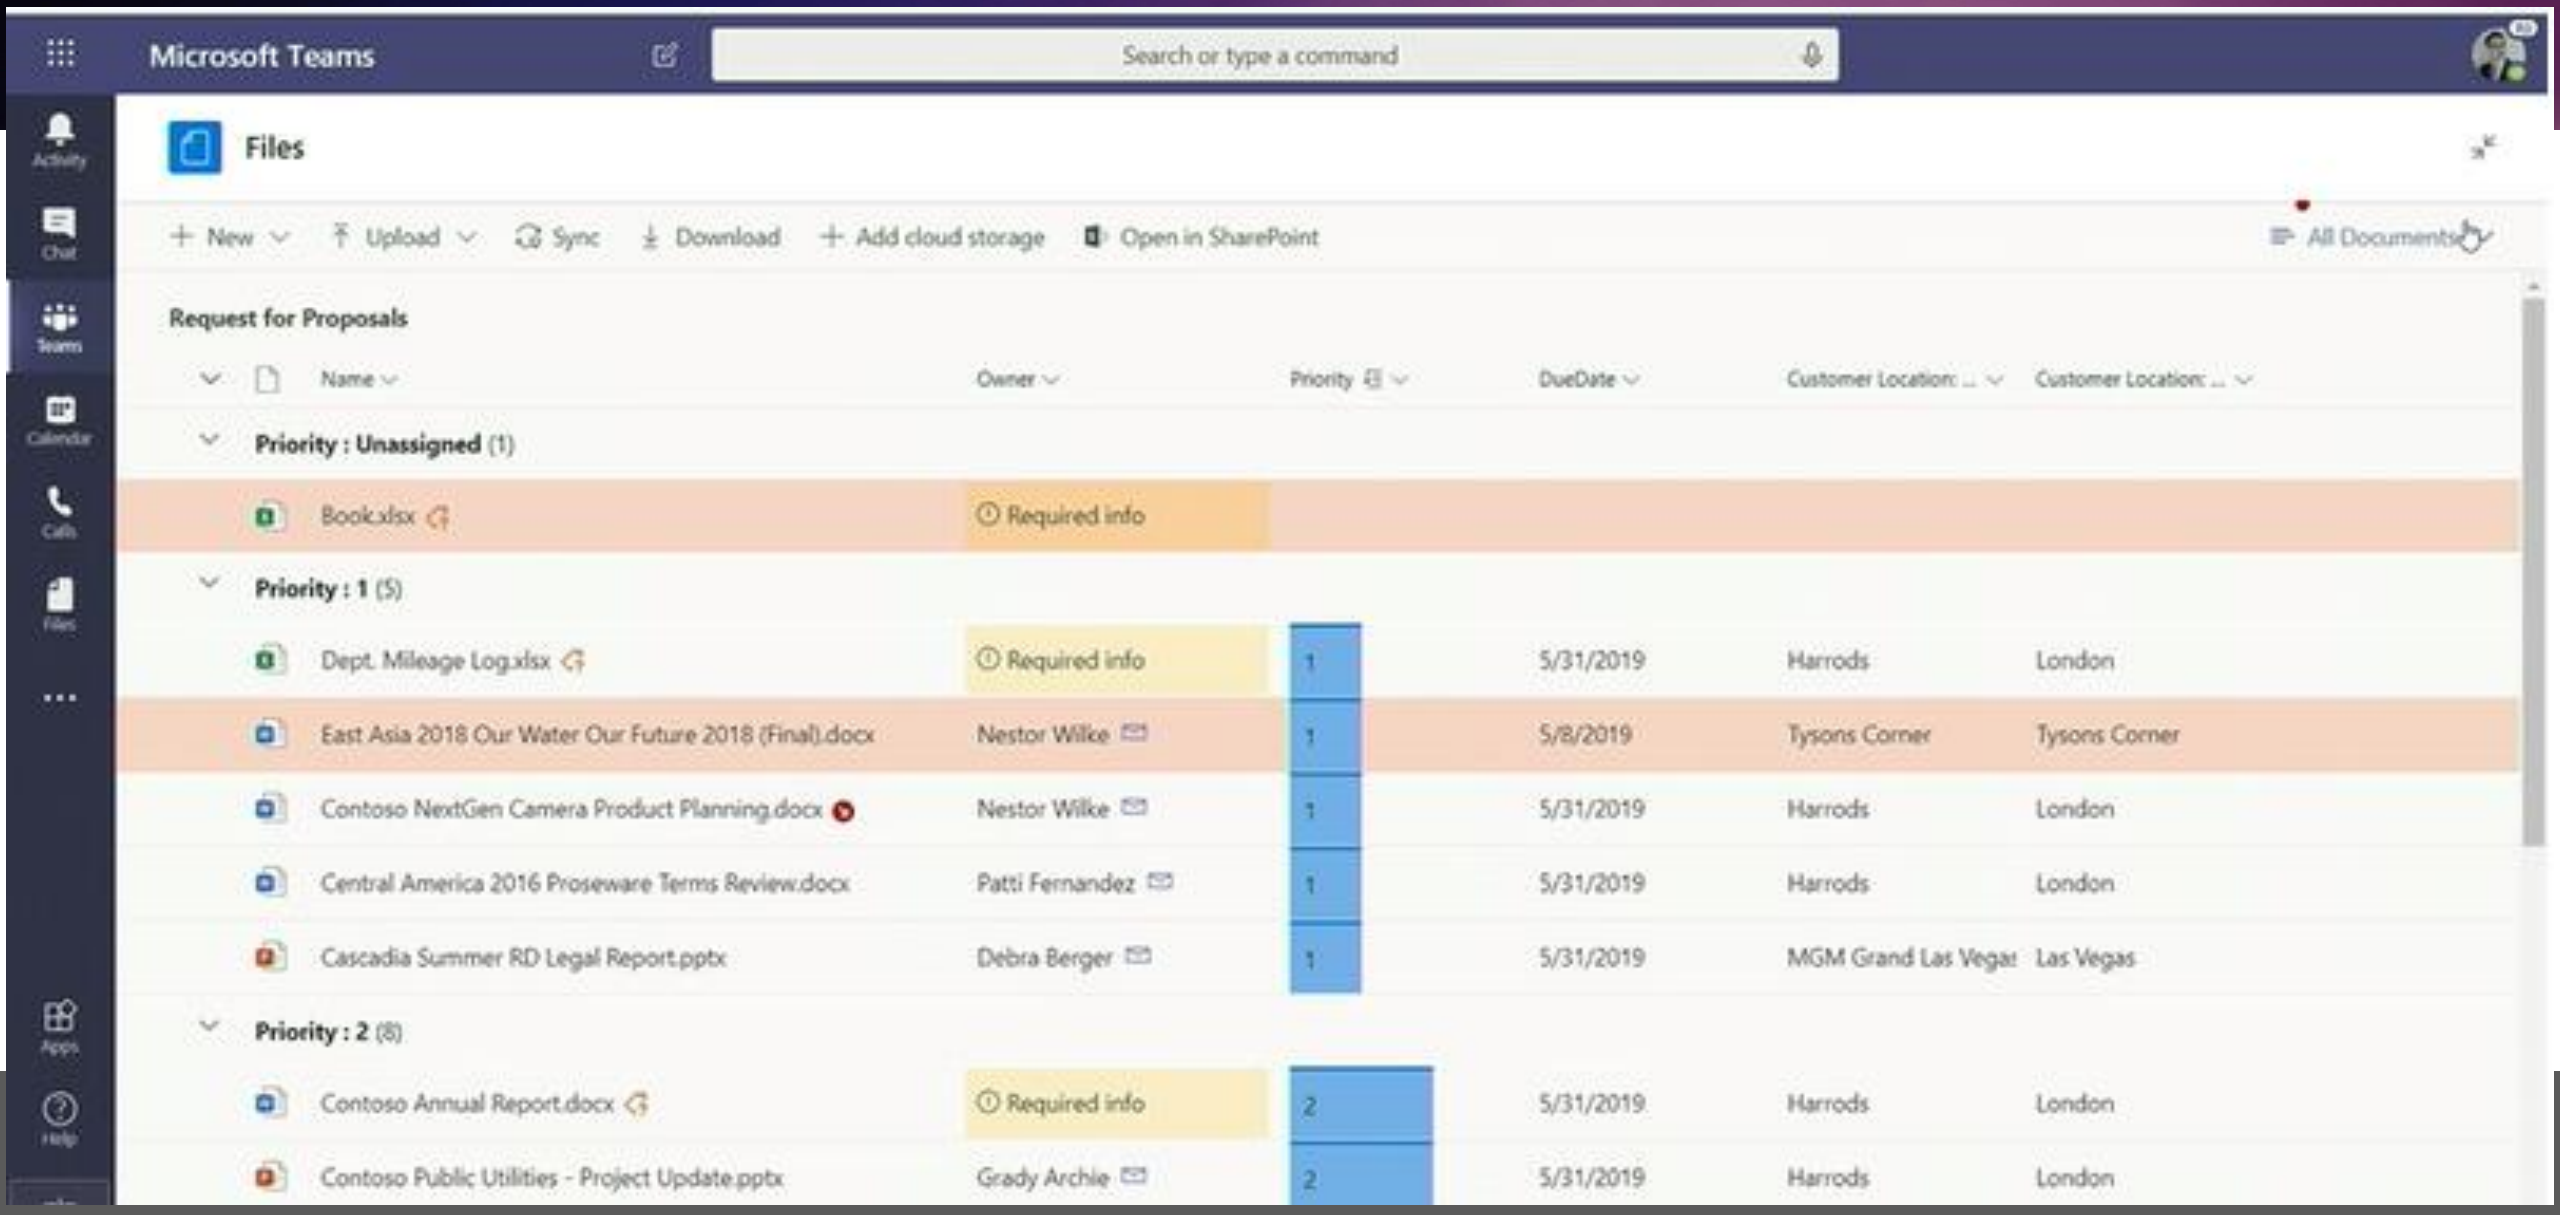


Microsoft Teams

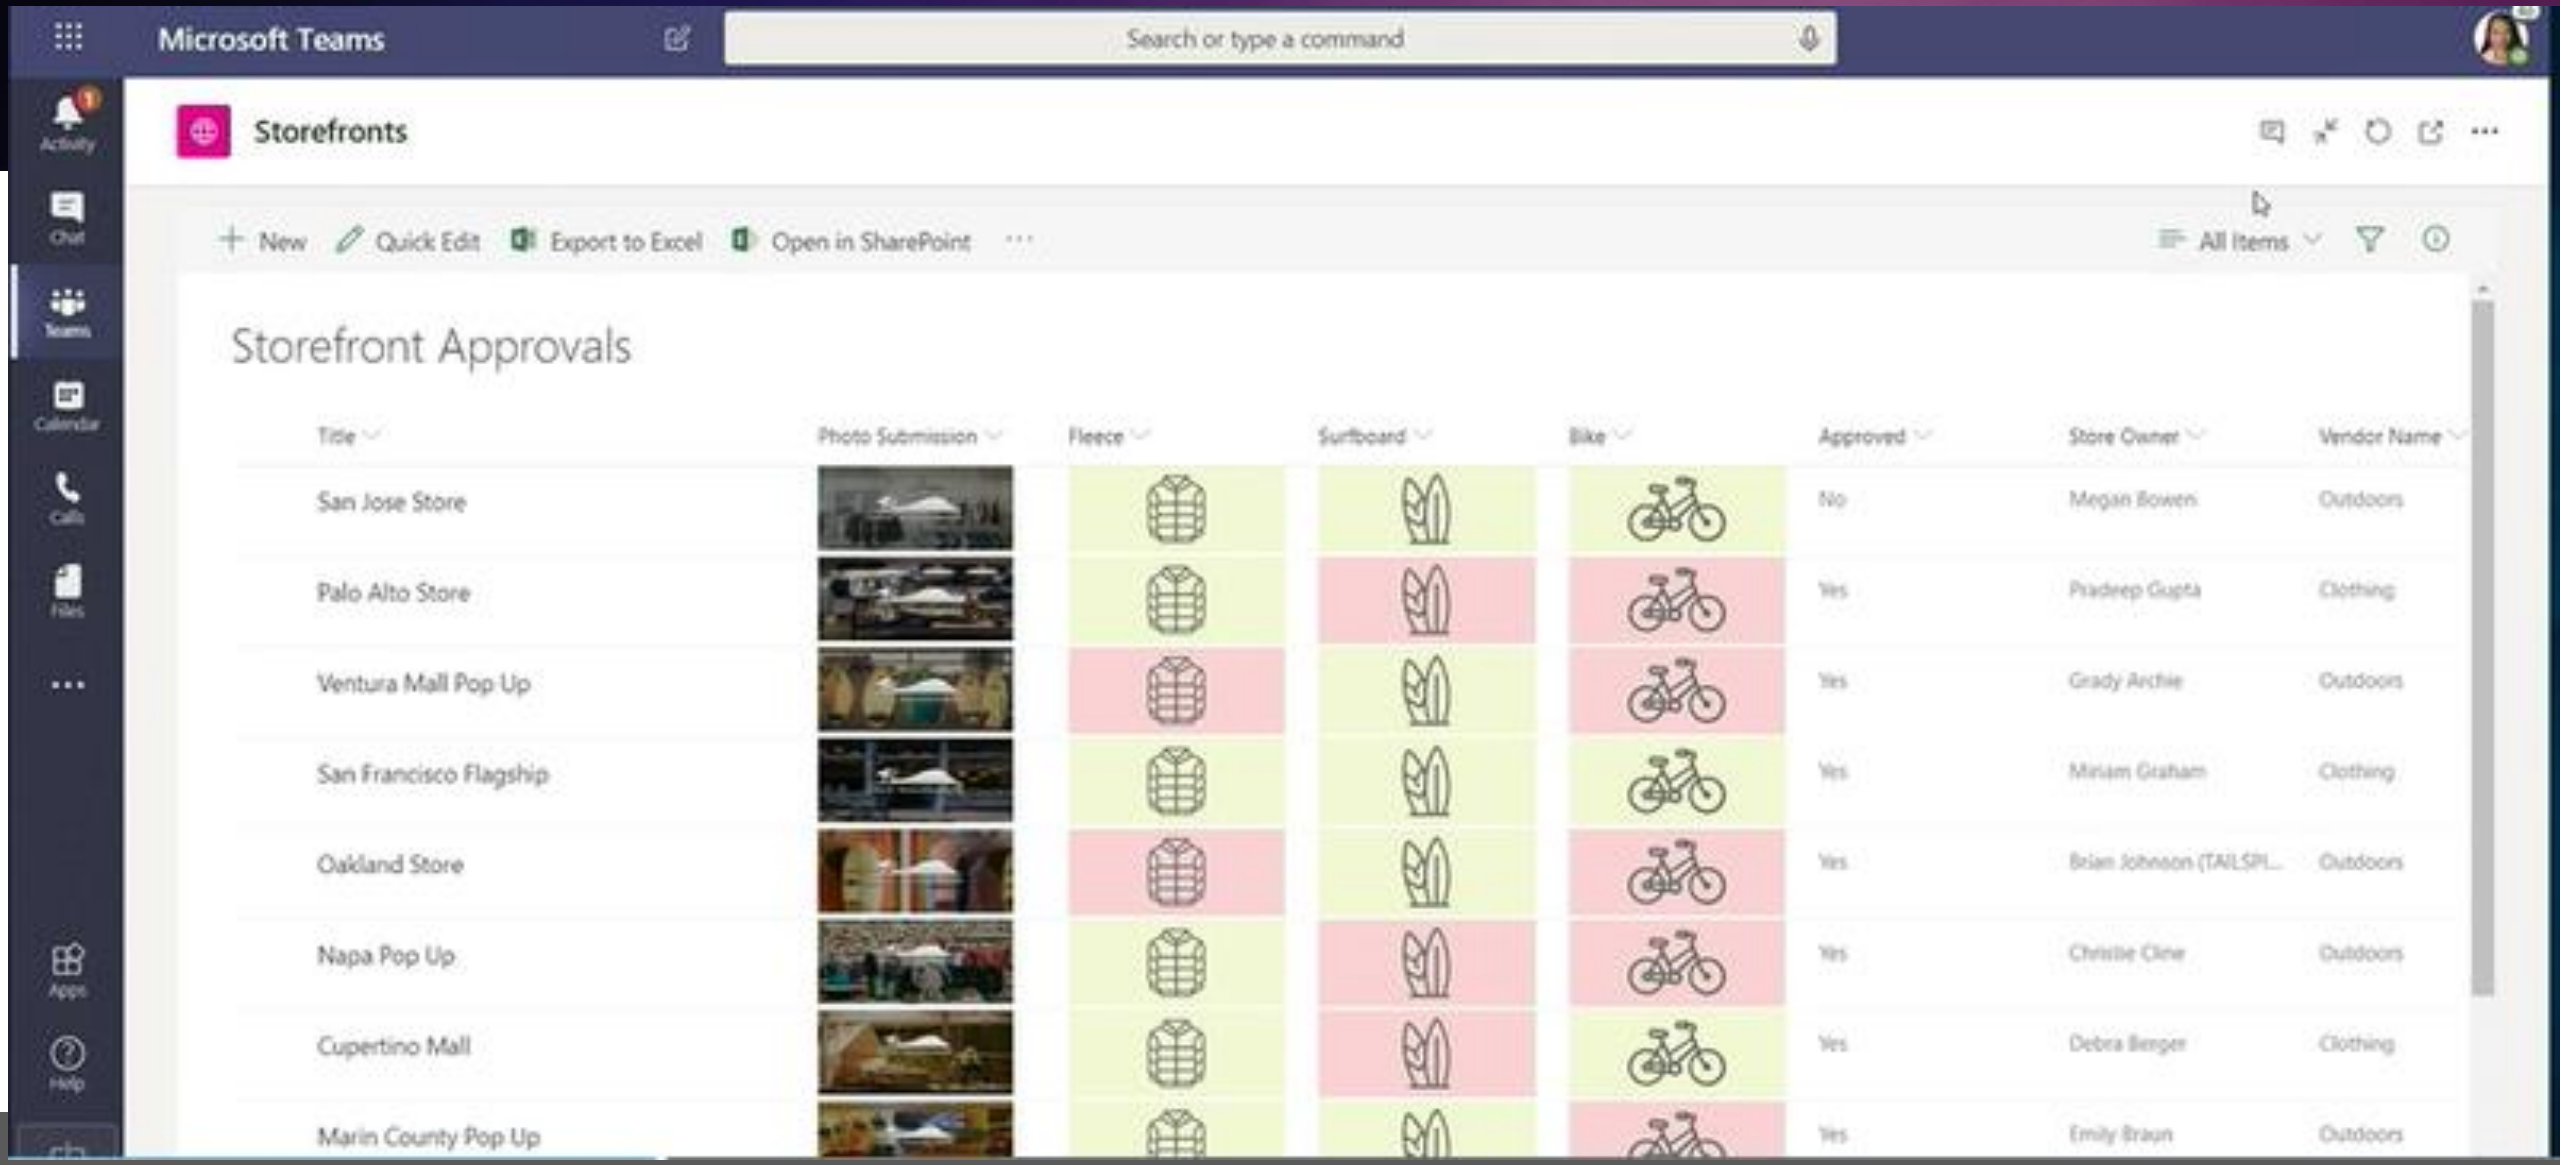
MS Teams / SP Integration Improvements

- Now you can work in SharePoint libraries within Teams, with the full library experience, including metadata columns and column formatting. Work in libraries within Teams, in the same way, with the same SharePoint interface and menus that you are familiar with.

Teams (Metadata)



MS Teams – Full List Views



PowerApps

PowerApps + SharePoint

- Oct – Dec 2019 it will be possible to use PowerApps to "build custom forms for document libraries" in SharePoint and Microsoft Teams. This summer there will be a private preview of Compliant Workspaces, a feature that lets organizations drill down into single files to manage their retention policies

Flow

MS Flow Update

- The SharePoint Connector for Microsoft Flow, a solution for automating tasks, will be getting "new actions to check-in/check-out documents, get version information, grant access, and create folders." Those enhancements are scheduled for "targeted release in August 2019."

Stream

Stream Improvements

- Interactive quizzes, polls and surveys in Stream videos - June 2019
- The Stream Web Part in SharePoint Online now has an "all of Stream" option that lets users link to all Stream videos.
- People are more engaged with videos that they watch, when there is a capability to interact with them.
- Now you will be able to do things like add a survey to a recorded departmental meeting, quizzes for training videos, and even provide assessments for employees to fill in.
- New updates to the Stream Mobile App

Yammer

Yammer

- Live events can be created and streamed from within the Yammer interface, using Stream.
- Viewers of your events can stay engaged by having threaded conversations before, during and after each event.
- Videos can now even be recorded and uploaded from within the Stream mobile app.
- Yammer Conversations Web Part now available (plug into a SP Site)
- Yammer is getting Rich Text Capabilities (bold, Links, Italics, bullets)
- A new Q+A Yammer feature is coming July 2019 (with bot functionality)

Governance

Governance

3 Keys to Governance

1. **Goals.** What is the desired end state? What does a successful deployment look like?
2. **Roles.** Who is going to help you meet the goals?
3. **Tasks.** What needs to happen to meet the goals?

Common concerns

- People will create too many teams and sites and there will be duplications, confusion, and total DOOM
- Intellectual property will be lost
- Guests will have access to things shouldn't
- People won't be able to access to things they need
- Performance will suffer due to too many teams and sites

Control governance before day one
