Phases of management

A guide to get from A to B

Prep your admin team

The people who will be supporting the product should be ready to use MS Teams themselves

- [Successwithteams.com](https://www.successwithteams.com)

Assign the right admin roles

- **Teams Service Administrator: The overall Teams workload admin, who can also manage O365 Groups**
- **Teams Communications Administrator:** Can manage meetings and calling functionality in Teams
- **Teams Communications Support Engineer:** Access to advanced call analytics tools
- **Teams Communications Support Specialist:** Access to basic call analytics tools
- Others, depending on your IT structure!

Renewal notifications are emailed to group owners 30 days, 15 days, and one day prior to group expiration. Group owners must have Exchange licenses to receive notification emails. If a group is not renewed, it is deleted along with its associated content from sources such as Outlook, SharePoint, Teams, and PowerBI.

What is Microsoft Teams?

📁 [More setup guides](#) ▾

Microsoft Teams is a dedicated hub that brings together the people, conversations, content, and tools your team needs to collaborate and achieve more. Microsoft Teams allows you to readily communicate and make quick decisions in real time. With Teams, you can initiate a private or group chat, share files, and co-author content. You can host online meetings with people inside or outside your organization. You can make, receive, and transfer calls. And you can communicate across devices, in the office or on the go.

IMPORTANT: Before you can use Office 365 products, you'll need to add your users. Consider verifying your domain to allow users to sign in with usernames associated with that domain (for example, mark@contoso.com). If you need to complete these steps, see [Prepare your environment](#).

How do I get set up?

About this course

In this introductory course you will learn the six critical elements of driving adoption of your Microsoft cloud services to deliver value to your company. This course is applicable to any size company and uses Office 365 and Microsoft Teams as the example service to create real world scenarios.

You will learn specifics about the critical elements in successful adoption planning and execution including:

- Structure of a service adoption team
- How to create service strategy & success measures
- Communication methods for training & service awareness
- Feedback & community management tools
- Technical readiness elements

The course is intended for training, communications or adoption staff as well as IT professionals that manage an Office 365 deployment.

Join the community of Office 365 Champions and Adoption Specialists at <https://aka.ms/O365Champions> to share your experience and learn from others who are driving adoption of cloud services.

What you'll learn

- Drive adoption of Office 365 and Microsoft Teams for your organization as example workloads in a cloud service adoption strategy.
- Write a collaboration and communications service strategy.
- Utilize the Outcomes Matrix to quantify and select success measures.
- Structure early adopter and champion programs.
- Work with technical talent to ensure service readiness and quality.
- Configure scalable user feedback methods.

WorkshopPLUS: Journey to Microsoft Teams 1 Day

New workshop release!

- Great for customers in the planning phases for Microsoft Teams
- One day workshop aimed at technical decision makers and project managers
- Help customers to prepare for deployment
- Focuses on Intelligent communications and collaboration

Office 365: Journey to Microsoft Teams

WorkshopPLUS

Duration: [1 day] | **Focus Area:** [Upgrade, Migration and Deployment] | **Difficulty:** [Medium]

The Journey to Microsoft Teams workshop will help you prepare your organization for the deployment of Microsoft Teams. This one-day workshop is aimed at technical decision makers and project planners who are starting the envisioning process of their project plan for a Microsoft Teams deployment. During this workshop, a Microsoft Teams expert will discuss the proper planning, execution and support of a successful deployment, using proven tips and methodologies gathered from successful Teams deployments.

Not only will you learn what you need to do, but how to do it and how to prepare your organization for the changes that the cloud brings.

♦ OUTCOMES ♦

01 SKILLS

Learn about the Microsoft Universal Toolkit for Teamwork, bringing together the best of Office 365. Understand the requirements, success tips and how to prepare for the deployment

02 BEST PRACTICES

Knowing the requirements and what it will take to successfully deploy Teams. You can focus your team on the tools, techniques and methodologies to provide the best user experience possible in the cloud.

03 WAY FORWARD

Recommendations and guidance to help navigate your team and organization onward in its journey to Microsoft Teams

♦ CAPABILITIES ♦

The formula for a successful Microsoft Teams deployment includes planning for people, process and technology. This offering addresses the all three of these key areas.

OUR EXPERTISE

Learn from industry experts that help enterprise customers solve their most challenging problems.

OPTIMAL OUTCOMES

Microsoft Premier Services aim to get you where you want to go faster regardless of where you are on the digital journey.

IN-DEPTH LEARNING

Deep technical training that equips you to overcome challenging problems in the real world.

MICROSOFT MAKES NO WARRANTIES, EXPRESS OR IMPLIED, IN THIS SUMMARY

Microsoft Teams Essentials

A vision for seamless communications

The Microsoft Teams Essentials engagement guides organizations through a structured process to define a strategy for enabling Teams for your users by identifying and prioritizing the key usage scenarios—with a focus on key business outcomes for employee productivity, engagement and innovation in today's workplace. Onsite planning sessions use structured thinking on how communication and collaboration capabilities can help meet specific business challenges and opportunities to drive teamwork and innovation resulting in a solution vision, storyboard, and blueprint that is aligned with your business objectives.

Custom Engagement's

- For deeper technical led engagements
 - More specific to customer requirements, e.g. Intelligent Communications, Security & Compliance, Pilot & Deployment etc
 - Can be a 2 or 3 onsite workshop with documentation handover
 - Will require tight scoping to set expectations
 - Reach out to local Teams champs in AU for more info

Custom Engagement Example - Teams Automation

- Customers looking to implement automated provisioning with approval process
 - Solution based on PowerApps, Flow and Azure Function Apps
 - Can be customised based on customer's needs
 - Applies specific templates to SharePoint sites generated over the default template that's created when a Teams is created
